
eaves

a museum pass to an immersive and customised experience

Eaves enables the visitor to come closer to the exhibitions by limiting the amount of visual queues for the visitor, enhancing the auditive context. At the same time bringing a person closer to the art, and the artist closer to the person observing their work.

Extending the service, it enables digital visits, opening up museums for everyone, everywhere. By exploring the element of auditive augmented reality, an opportunity opens up for museum visits to people with visual impairments or those with difficulties learning through text.

Like going to a museum with a knowledgable friend, or eaves-dropping into a guided tour, Eaves tailors your visit to your expectations, your behaviour, your abilities and your past museum visits, opening up the museum experience to all.

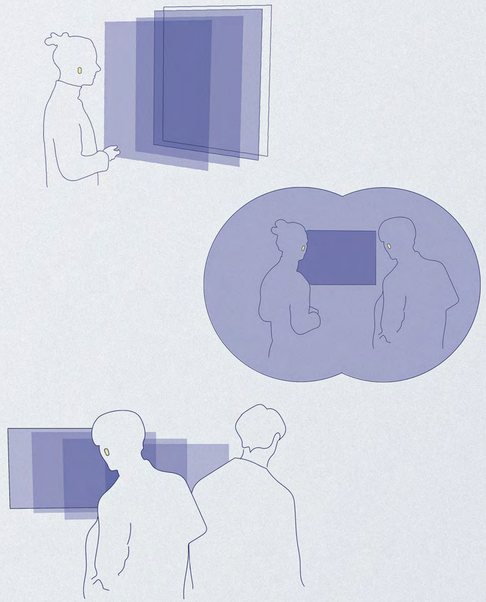
Displays the duration of the narrative
Colour indicates battery status

Closed body for optimal hygiene

Wireless capacitive charging pad for ease of use

Interchangeable and removable glasp
Customisable to the museum's style



4 Functions to immerse you into your physical museum visit

When coming closer to an artwork the narrative starts playing automatically, until you walk away.

As you move on you can keep the sound by pressing long on the device, where both sound and light confirm your choice.

Have a friend join your Eaves bubble anytime and synchronise audio to listen together by placing your device on top of theirs.

Through personalised navigation with locators in the museum, Eaves will keep you on track so you don't lose your way.

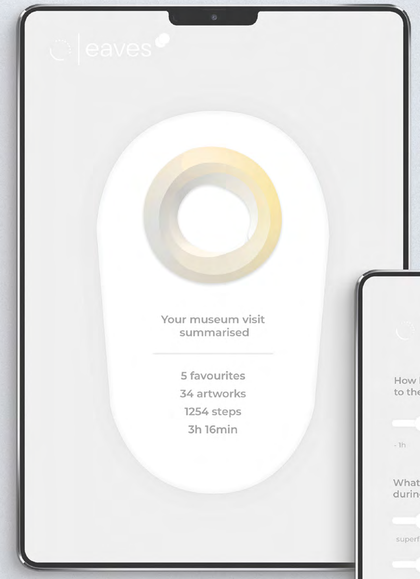
Set up Eaves based on your expectations

During your visit, Eaves is your companion and your museum pass, while informing you on the pieces that intrigue you. Based on your preferred timeframe and level of interest it guides you through the exhibitions and its architecture.



Return the device and receive a souvenir

The Eaves summary is a digital souvenir, compiling your museum trip. Use it to immerse yourself into the experience, enabling digital touring, opening up museums for everyone everywhere.
