

Class: Type 5
Student: Zeke Wattles
Instructor: Brad Bartlett
Entity: Dublab (online radio station)
Event: Indeterminacy (exploring chance in music through John Cage and more)

Poster generation software allows guests to create their own unique poster using a controlled set of parameters, print it with a dot matrix printer, display it through the duration of the event, and take it home at the end to commemorate the unique, time-based nature of musical performance. Instead of designing a traditional poster, I wanted to approach it as a sandbox for users to create their own graphic works within a system of my creation.
